# What they say about us

« The action of Planet Citizens' international volunteers allows children to acquire transversal skills via practicing English through sports. Skills ranging from civic and moral education to geography, etc. Thanks to their interventions, volunteers allow a real opening to the world for our pupils : they discover foreign cultures, find out that they can study wherever in the world.

*Julie GARCIA, Barbès school director, Nîmes*

« The level of understanding in English has increased thanks to the immersion created by the European volunteers and the Service Civique volunteers. The pupils discovered the English language.

*Jonathan Baure, Louise Michel school teacher, La Courneuve*

« I have seen how my daughter improved and started to like this language. Being able to talk to Emma became a real personal objective. Thanks to sport, the language barrier isn't a problem anymore. This initiative created links with people who otherwise wouldn't have met. After Emma finished her mission and went back to Sweden, my daughter and her kept communicating in English. And after one year, Emma came back to visit us again. Now it's our turn to go to Sweden !

*Nasser Hamici, father of two beneficiaries, at Stains tennis club*
